

TP69T **DUAL CHANNEL EXTERNAL TYPE TIRE PRESSURE SENSORS**

- DIY Installation : Installed directly on the gas nozzle
- Working Temperature : -40°C ~ 125°C
- Temperature Accuracy : $\pm 1^{\circ}\text{C}$
- Waterproof Standard : IP-68
- Environmental friendly; can change battery
- Maximum amount of measured pressure : 1300kPa
- Pressure Measurement Accuracy : ± 1 psi
- Dimensions : Diameter 22mm, height 20mm, length 43mm
- Weight : 15g
- Intelligent Data Transfer : rapid pressure changes, continuous transmission for 20 seconds; under normal condition, transmit 1 time per 32 seconds
- 32bits ID Code : Each sensor has a unique ID
- Anti-theft design
